

Mission Critical Forensics

DRIVING RESOLUTION

Uncovering Truth in Complexity

When the Stakes are High, a Standard Opinion Isn't Enough

Mission Critical Forensics (MCF) is a specialized forensic engineering firm, and a trade name of Mission Critical Engineers Ltd.

Identifying the initial point of failure is not enough. A standard forensic report may document *what* broke, but it often fails to determine the root cause, uncover systemic vulnerabilities, or provide the strategic insights needed to prevent recurrence.

For your most critical cases—where financial exposure is significant and legal scrutiny is intense—you need more than an opinion. You need a definitive conclusion forged with the discipline of a high-stakes environment.

This is the MCF Advantage.

Independent and impartial

Findings based solely on evidence

Systemic

The whole system, not one component

Court-ready

Defensible reports and expert testimony

Experienced team

A group of experienced forensic experts

Our Services

While our approach is unique, our expertise covers the full spectrum of forensic investigation:

INVESTIGATION

Electrical Failures

Analyzing failures across low, medium, and high-voltage systems, including transformers and switchgear.

INVESTIGATION

Equipment Breakdowns

Determining the cause of equipment malfunctions.

INVESTIGATION

Fires & Explosions

Expert Origin & Cause determination for fires and explosions.

INVESTIGATION

BESS Fire Investigation

Specialist investigation for battery storage fires and explosions.

INVESTIGATION

Renewable Energy Systems

Expert forensic investigation of BESS, solar, and wind system failures.

INVESTIGATION

Data Centre Failures

Investigating technical failures in critical facilities.

LITIGATION

Subrogation & Expert Witness

Serious cases need serious experts. Supporting claims and legal proceedings with technical analysis and expert testimony.

ADVISORY

Post-Incident Advisory

Assessing damage and supporting restoration & claims.

ADVISORY

Specialty Risk Assessment

Proactively evaluating system vulnerabilities and risks.

Our Discipline is Your Advantage

Our approach was forged in mission-critical environments where failure is not an option. We apply that same systemic rigor to every investigation, providing:

Definitive Conclusions

Data-driven analysis that withstands legal scrutiny and strengthens your claim.

Systemic Analysis

Root-cause investigation that identifies latent vulnerabilities beyond the initial point of failure.

Strategic Insight

Actionable reports that facilitate a smoother claims process and prevent recurrence.

Request a Briefing

For your most critical cases, don't settle for a standard approach. Contact us to schedule a briefing on how our mission-critical discipline can deliver the clarity and certainty you require.
